

DEKA (EI.En. Group) Establishes a Medical Advisory Board for Female Intimate Health

November 24, 2020 09:51 AM Eastern Standard Time

MILAN--([BUSINESS WIRE](#))--DEKA M.E.L.A. Srl (a subsidiary of EI.En Spa - listed on the Italian Stock Exchange ELN.MI), a laser and opto-electronics company engaged in the development of gynecological energy based devices and therapies for the treatment of women health diseases, today announced the establishment of its Medical Advisory Board (MAB) for Female Intimate Health.

DEKA (EI.En. Group) Establishes a Medical Advisory Board for Female Intimate Health.

Initial members include Prof. **Stefano Salvatore**, MD (Coordinator), Prof. **Linda Cardozo**, MD, **Maurizio Filippini**, MD, Prof. **Stavros Athanasiou**, MD, Prof. **James Simon**, MD, Prof **Diaa Essameldin Ali Rizk**, MD, **Christopher Chong Yew Luen**, MD, **Pablo Gonzales**, MD, internationally highly recognized experts in their respective female health specialties, and **Alberto Calligaro**, Professor Emeritus of Histology at the University of Pavia (Italy), one of the most brilliant histologists in the world.

In this MAB almost all continents are represented.

The Board will contribute to the definition of an overall clinical development plan for new protocols and clinical guidance, refining energy based techniques and methods for women's intimate health.

The Members of the Board will permanently preserve the independence of their work, and DEKA will by no means interfere with their clinical and academic activities.

"I'm particularly honored and proud to join this very prestigious Board, as the first coordinator of the DEKA MAB" **Professor Stefano Salvatore**, MD said – "All our Medical Advisory Board Members are global health care professionals bringing their unique perspectives and expertise to the Group. I look forward, with all of them, to providing valuable insights on current female health and wellness needs, with the target for the Board Members to serve as thought leaders on program development, and provide critical review of new ideas, devices, and procedures" Salvatore closed.

"The establishment of this MAB, with extended name "**Medical Advisory Board – Female Intimate Health**", marks an important milestone for DEKA, for the international scientific community, and for women suffering of several gynecological conditions" stated **Paolo Salvadeo**, General Manager of EI.En. and Managing Director of DEKA. "I'm 100% positive that this outstanding Group of experts will also increase the number of scientific publications which now counts more than 65 clinical studies already carried out with the world famous Monalisa Touch CO₂ laser, increasing knowledge and experiences through further investigation and addition of new laser wavelengths and probes" concluded Salvadeo.
